

NATALIA PAVLOVA

FULL-STACK DEVELOPER

Summary

I'm in the progress of becoming a Full-Stack Web Developer who loves growth and innovation with over one year of experience creating user-friendly interfaces using cutting-edge technologies. I have sound knowledge of HTML, CSS, JavaScript, React, Redux. Also, I have experience in Node JS, Golang. While working on the team projects, I had hands-on experience in following the Agile/SCRUM methodology. I'm looking for a remote job in web application development where I can apply and improve my skills. I'm responsible, attentive to detail and open to learning new. My main goals are simple - work as a team member, strive for excellence and satisfy customer needs.

Project Experience

Team Projects:

1. Donut Masterclass[HTML, CSS, SASS, Parcel, jQuery]

Description: mobile-first adaptive and responsive web site of donut masterclass.

My tasks: section Registration, form validation and their stylization, animation of the donuts, scroll-up button.

2. Event booster[HTML, CSS, JavaScript, RestApi, Ajax, Parcel, Handlebars, Protify, Lodash]

Description: mobile-first adaptive and responsive web site for finding events in the world, with ability to choose an event by name, country and buy tickets.

My tasks: background rendering (mobile, tablet, desktop), themes switcher, team-modal window, dynamic scroll-up button, section Footer, all visual part in the light theme and animation.

3. Kapu\$ta[React, Redux, Nodejs, MongoDB, DatePicker, MaterialUI, Victory]

Description: mobile-first adaptive and responsive web application for systematization and simplify the calculation of the user's expenses and incomes.

My tasks: markup and styles of the «Expense»/«Income» and «Summary» sections (mobile, tablet, desktop), a pop-up list of custom categories select, components for input, clear and delete options, loader style, calendar and custom calculator components, team modal window...

4. Edora[React, Redux, Golang, Gin, Gorm, PostgreSQL, MaterialUI, Joi, Moment.js, i18n]

Description: marketplace with safe purchase and convenient delivery.

My tasks: getting ads from the database; pagination, filtering, sorting ads; saving all search queries into URL for the ability to share the link; currency conversion (API of Privat Bank); page scroll up; «Home» & «About us» pages.

Own Projects:

1. WebStudio, BarberShop[HTML, CSS, SASS, BEM]

2. Image finder, Countries[JavaScript, HTML, SASS, CRUD, Parcel]

3. Movie Search, Phone Book[React.js, Redux Toolkit, Axios, CSS Modules]
